The business ethical culture in South Africa was and is still being shaped by a number of social and political influences that include its colonial history, the legacy of Apartheid, and the election of the first democratic government in 1994, after which President Nelson Mandela ' s government started the process of redressing the racial imbalances and inequalities that resulted from Apartheid.

African philosophies about the way to live a flourishing life are predominantly virtue-oriented. However, narratives of African conceptions of virtue are uncommon. This book therefore helps bridge an important gap in literature. Authors writing from South Africa, Ghana, Egypt, Kenya, Mauritius, Côte D ' Ivoire and Nigeria share research on indigenous wisdoms on virtue, displaying marked consensus about the communitarian nature of African virtue ethics traditions and virtues essential for a flourishing life. They also show how indigenous virtue ethics improve corporate practices. This book will be a launchpad for further studies in Afriethics as well as a medium for sharing rich knowledge with the rest of the world.

Corporate citizenship is enmeshed in the debate about Africa's future. Africa is the continent where the social needs are greatest and where the benefits of globalisation have been least felt. What makes corporate citizenship in Africa not only fascinating, but also of critical importance, is that the continent embodies many of the most vexing dilemmas that business faces in attempts to be responsible, ethical and sustainable. This unique collection for the first time brings together in one publication the critical debates, perspectives, experiences and success stories in the emerging field of corporate citizenship in Africa. The book addresses a number of key questions: What research has been conducted on corporate citizenship in Africa over the past ten years? How are the concepts and challenges of corporate citizenship in Africa different, compared to other regions of the world? Which industry sectors are leading in the implementation of corporate citizenship in Africa? What are some of the dilemmas facing companies that are striving to be good corporate citizens in Africa? What are some of the best-practice case studies of companies' corporate citizenship programmes in Africa? What can Africa learn from the rest of the world about corporate citizenship, and what can it teach others? The book acts as a bridge in many ways: between academic theory and business practice; between notions of corporate citizenship originating in developed countries and emerging concepts incubated in a developing-country context; between the experiences of multinationals and the perspectives of small and medium-sized enterprises; between different countries and regions within Africa and around the globe. This publication marks a change in the tide – a groundswell towards a more vigorous debate and robust research agenda on corporate citizenship in Africa. It will be essential reading for all those involved in the rapidly growing corporate responsibility movement.

Accounting Ethics Education: Teaching Virtues and Values gathers a diversity of contributions from invited, well-known experts. It promotes a comprehensive reflection around how ethics can and should be taught to accounting students, discussing and highlighting the most updated research on accounting ethics education, and it is an essential reference in the field. The subject of accounting ethics education is critical to foster ethical awareness that may prevent the way in which one acts or behaves, especially towards others. Examining multiple perspectives, Accounting Ethics Education: Teaching Virtues and Values advances the scholarly debate by providing cuttingedge and insightful research vital for all those interested and immersed in these matters. It begins with a historical perspective of accounting ethics education and continues by exploring challenges, opportunities and developments in the area.
