The shortage of adequately prepared health professionals is the most significant threat to world health that we face. This book, a co-publication with The Carter Center, focuses on the training of health professional educators--both teachers and practitioners--in low--resource countries at different levels of technological and material sophistication. This comprehensive book trains health

educators and practitioners to improve their pedagogical skills and to increase the quality and numbers of health workers. It also assists physicians, nurses, health officers, medical lab technicians, and environmental technicians to work with different cultures and linguistic groups in any one country. For the growing number of health educators and practitioners in developed countries who

teach, research, and practice within the international context, it is an essential resource. Key Features: Preface by former US President Jimmy Carter Offers teaching and learning methods evaluated and field tested through The Carter Center's Ethiopia Public Health Training Initiative with positive results in over 500 health care centers Provides both teaching and learning strategies for

countries and cultures at different levels of technological and material development Presents research-based theories, evidence--based models, and critical thinking skills through active teaching and learning strategies Highlights faculty leadership in developing interdisciplinary teams and educational outcomes

Surfaces in 4-Space, written by leading specialists in the field, discusses knotted surfaces in 4-dimensional space and surveys many of the known results in the area. Results on knotted surface diagrams, constructions of knotted surfaces, classically defined invariants, and new invariants defined via quandle homology theory are presented. The last chapter comprises many recent results, and techniques for computation are presented. New tables of quandles with a few elements and the homology groups thereof are included. This book contains many new illustrations of knotted surface diagrams. The reader of the book will become intimately aware of the subtleties in going from the classical case of knotted circles in 3-space to this higher dimensional case. As a survey, the book is a guide book to the extensive literature on knotted surfaces and will become a useful reference for graduate students and researchers in mathematics and physics.

This book presents findings from the papers accepted at the Cyber Security Education Stream and Cyber Security Technology Stream of The National Cyber Summit's Research Track, reporting on latest advances on topics ranging from software security to cyber-attack detection and modelling to the use of machine learning in cyber security to legislation and policy to surveying of small businesses to cyber competition, and so on. Understanding the latest capabilities in cyber security ensures users and organizations are best prepared for potential negative events. This book is of interest to cyber security researchers, educators and practitioners, as well as students seeking to learn about cyber security.

The uneasy balance between these worlds is shattered when Starr

witnesses the fatal shooting of her childhood best friend Khalil at the hands of a police officer. Khalil was unarmed. Soon afterward, his death is a national headline. Some are calling him a thug, maybe even a drug dealer and a gangbanger. Protesters are taking to the streets in Khalil's name. Some cops and the local drug lord try to intimidate Starr and her family. What everyone wants to know is: what really went down that night? And the only person alive who can answer that is Starr. But what Starr does—or does not—say could upend her community. It could also endanger her life. Want more of Garden Heights? Catch Maverick and Seven's story in Concrete Rose, Angie Thomas's powerful prequel to The Hate U Give.

Lecture Notes: Tropical Medicine is a comprehensive introduction to tropical medicine. The new edition is in full colour throughout with over 40 colour images integrated with the text. There is a new chapter on syndromes of undernutrition (in both children and adults), and the section on non-communicable diseases has been extended to include mental health problems in the tropics. The core information is presented in a clear and concise way, with extensive use of diagrams, algorithms, tables and boxes. All chapters have been updated to reflect current best practice and the annotated bibliographies and lists of web-based resources have been extended. The chapters on HIV, tuberculosis and malaria have undergone particularly extensive revision, reflecting rapid changes in these areas since the last edition. Lecture Notes: Tropical Medicine is particularly aimed at postgraduate doctors attending tropical medicine courses, as well as medical students taking a tropical medicine elective period. It will also be useful to a wide range of other health professionals involved with medicine in the tropics, or imported tropical disease.
