G.A.C.E. Flying Club, Inc.

modeled correctly to achieve a high-fidelity flight model. The Cessna 172 featured in X-Plane-11 is the "Skyhawk" variant. This aircraft has been modeled by our design team with a degree of accuracy that ensures its flight characteristics are very like those of the real aircraft. However, despite this, some differences will be apparent, because even the smallest factor plays into the ...

Manual/Checklist For Default 172SP for FSX

The Cessna 172 Skyhawk is an American four-seat, single-engine, high wing, fixed-wing aircraft made by the Cessna Aircraft Company. First flown in 1955, more 172s have been built than any other aircraft. It was developed from the 1948 Cessna 170, using tricycle undercarriage, rather than a tail-dragger configuration.

Cessna 172 - Wikipedia

The Cessna 172 was essentially a tri-cycle undercarriage version of the Cessna 170 and is the most successful light aircraft in history. In production since 1956, over 43,000 of all models have been built. The military T-41 variant is essentially similar and used for basic flight screening and training, but utilises a more powerful engine.
