Corporate Finance, by Ross, Westerfield, and Jaffe is a popular textbook that emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. Brad Jordan, known for his successful work on the RWJ Fundamentals and Essentials books, contributed to this edition. His influence will be seen particularly in the writing style with smoother coverage of topics, and the increased quality in the problem material.

Essentials of Corporate Finance 4e provides students with a succinct introduction to the principles and practice of corporate and business finance. This market-leading text, adapted by Rowan Trayler and Gerhard Van de Venter, retains the accessible and popular Ross style by focusing on key concepts and a range of local and global case studies. The new edition features enhanced content coverage in areas such as company valuation using the Weighted Average Cost of Capital (WACC) and crowdfunding. The comprehensive end-of-chapter content and extensive digital resources help students solve financial problem and apply their learning in real-world scenarios. In addition, the integrated solutions to questions have been designed to help improve students' analytical and problem-solving skills. Accessible, engaging and concise, this is the essential resource for finance majors and non-majors alike.
