Answers  
These giant storms,

which form in tropical areas, have an unusual

structure. As you

approach the center of a

hurricane, wind speed

increases until you pass

through the eye wall

(where wind speeds are

maximum) and into the

Acces PDF

Explore

eye. Then, the winds calm and the sun shines for a brief time—until the next eye wall arrives.

With the Hurricane Motion Gizmo, students view the structure of a hurricane and observe the weather conditions that occur as a hurricane moves over a weather station.

Teachable Moment:  
Hurricane Motion. by  
Heather Jones  
September 3, 2014.

Despite a mild hurricane season, we are at the peak of activity for 2014. Tropical Storm Dolly recently made landfall in Mexico, and Tropical Storm Norbert is looming off California Baja. In addition, storms are still
