Feedback Control Systems, 5e offers a thorough analysis of the principles of classical and modern feedback control in language that can be understood by students and practicing engineers with no prior background in the subject matter. Organized into three sections – analog control systems, digital control systems, and nonlinear analog control systems – this text helps students understand the difference between mathematical models and the physical systems that the models represent.

PHYSIOLOGICAL CONTROL SYSTEMS - BioMeds

(b) Feedback control system measures the controlled variable and compares the measured value with the desired value and then adjusts the manipulated variables for the control of the system accordingly.. Thus, the process variable to be controlled is measured in feedback control. Therefore, the provided statement is .
