Conditional Statements (15+ Examples in Geometry)

Variables, mostly p and q , often symbolize a conditional expression or a conditional expression. P is commonly used for indicating the hypothesis and Q is for the conclusion. There is also a logical connector with the conditional statement. The arrow sign indicates the logical connector.

Geometry Conditional Statements

Answer

Write the converse, inverse, and contrapositive of the conditional statement. Determine whether each statement is true or false. If a statement is false, find a counterexample. If 89 is divisible by 2, then 89 is an even number.
Converse: If 89 is an even number, then 89 is divisible by 2; true.
