problem-solving techniques then move on to grasp the key concepts of object-oriented, GUI programming, advanced GUI and Web programming using Java. Liang approaches Java GUI programming using JavaFX, not only because JavaFX is much simpler for new Java programmers to learn and use but because it has replaced Swing as the new GUI tool for developing cross-platform-rich Internet applications on desktop computers, on hand-held devices, and on the Web.

A fundamentals-first approach prepares students to learn object-oriented programming and advanced Java programming by first building foundational skills. The title has been changed to Introduction to Java Programming and Data Structures, Comprehensive to more accurately reflect the depth and breadth of coverage Liang provides. The Comprehensive edition contains coverage of all subjects taught in a typical data structures and algorithms course.
