American Motors's compact XJ Cherokee was to be replaced by a new and larger model known as the ZJ (later named the Jeep Grand Cherokee when introduced in 1993) that was under development by AMC. However, the smaller model's continuing popularity caused Chrysler executives to rethink this decision, and while the ZJ models were introduced in 1993, the XJ models were retained until 2001.

The 4.0 was the entry-level engine in the Grand Cherokee until the third-generation launched in 2005, replacing it with the far more problematic 3.7l Powertech V6 as the base option. It's a shame the 4.0 couldn't continue development, but Jeep had to cancel production of it due to increasing emissions regulations.
