Openamip

Software

OpenAMIP is an IP

# Read Free Openamip

based protocol that facilitates the exchange of information between an Antenna Controller Unit and a satellite router. It allows the router to command the antenna and enables the use of Automatic Beam Switching (ABS), which transfers

Read Free

Openamip

connectivity from one satellite beam to the next as a vessel passes through multiple footprints.

*OpenAMIP Solution Overview*

On controllers that have the OpenAMIP software option, there will be an additional

# Read Free Openamip

dropdown to allow the user to configure the modem listen port. The default modem listen port is shown in the image below. The modem will then need to be configured to talk to the ACU at the ACU IP address and modem listen port.
