Illuminating a little-known but extremely significant period in world history—the discovery of oil in the Middle East and the beginnings of what is now the Saudi Arabian Oil Company (Saudi Aramco)—this captivating history explores the birth of the Middle Eastern oil industry. From the king and his royal

court to the desert guides, scientists, and mechanics who built the original oil company, Aramco, the distant and desperately poor world of Depression-era Saudi Arabia is vividly brought to life. Written more than 50 years ago, this detailed account serves as a kind of time capsule and features the author's prescient insights into the cultural and technological consequences of King Ibn Saud's deliberate decision to choose America as his commercial ally.

What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by Rare Earth, and its implications for those who look to the heavens for companionship.
