Section 5.1, Population Ecology. What types of factors can affect the size of this population of otters? Characteristics of a Population. Geographic distribution- range, area inhabited by a population. Density- number of organisms in a given area.

## **Section 5.1, Population Ecology**

•Population distribution- the way individuals are spaced out across their range 1. Random- occurs when an individual in a population is independent of other individuals 2. Clumped- can help animals stay safe from predators 3. Uniform- can help each individual find food or take shelter

## **Section 5.1 How Populations Grow**

Section 5-1: How Populations Grow. Three important characteristics of a population are its geographic distribution, density, and growth rate. Three factors affect population size: the number of births, the number of deaths, and the number of individuals that enter or leave the population.

## **Chapter 5 Resources - miller and levine.com**

Population. Section 1. Population. This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys relating to population characteristics.
