"Compiled from Official gazette. Beginning with 1876, the volumes have included also decisions of United States courts, decisions of Secretary of Interior, opinions of Attorney-General, and important decisions of state courts in relation to patents, trade-marks, etc. 1869-94, not in Congressional set." Checklist of U. S. public documents, 1789-1909, p. 530.

Originally published in 1985. This investigation of Ovid’s fable takes a different tack to previous studies of the love lyric or the themes but looks at the creation of narrative strategies to explain Narcissus’ experience. The story has always been understood as literally impossible but invites readers to ask what is meant by the puzzling tale of deception and death. The limits placed on the fable by the commentaries of the medieval period allow us to appreciate the narrative expansion of the fable in twelfth and thirteenth-century poetry. Themes in this book are the way the fable is used as a means for knowledge of physical nature and the development of science; the importance of language in the fable and in its settings when rewritten in other texts, and psychoanalytic aspects of Echo and Narcissus. The fable has the capacity to represent mental life and psychological crisis within other narratives and this is also an important discussion point, based around the medieval text Roman de la Rose. The book also considers the wider Metamorphoses and Ovid’s importance for literature.

For every budding scientist who would like to think beyond the smoking volcano, diorama, and colored graphs of the typical school science fair. I is for Idea explores the development of bicycles, zippers, toilets, computers, and many other inventions that we now take for granted in our daily lives. Readers will learn about the inventors and the genesis behind these ever-present and useful items. Curious kids will find plenty of inspiration as they discover the answers to their continuous questions. What is the basis for the phrase "the real McCoy"? What actually is the mother of invention? What kitchen appliance was developed after a scientist's candy bar suddenly melted? Author Marcia Schonberg lives north of Columbus, Ohio. She is the author of more than a dozen books, including B is for Buckeye: An Ohio Alphabet. Illustrator Kandy Radzinski's first book with Sleeping Bear Press, S is for Sooner: An Oklahoma Alphabet, was the Oklahoma Center for the Book Best Illustrated Book 2004. She lives in Tulsa, Oklahoma.
