This book is intended for anyone whose job involves writing formal documentation. It is aimed at non-native speakers of English, but should also be of use for native speakers who have no training in technical writing. Technical writing is a skill that you can learn and this book outlines some simple ideas for writing clear documentation that will reflect well on your company, its image and its brand. The book has four parts: Structure and Content: Through examples, you will learn best practices in writing the various sections of a manual and what content to include. Clear Unambiguous English: You will learn how to write short clear sentences and paragraphs whose meaning will be immediately clear to the reader. Layout and Order Information: Here you will find guidelines on style issues, e.g., headings, bullets, punctuation and capitalization. Typical Grammar and Vocabulary Mistakes: This section is divided alphabetically and covers grammatical and vocabulary issues that are typical of user manuals.

You're only a startup CEO once. Do it well with Startup CEO, a "master class in building a business." —Dick Costolo, Former CEO, Twitter Being a startup CEO is a job like no other: it's difficult, risky, stressful, lonely, and often learned through trial and error. As a startup CEO seeing things for the first time, you're likely to make mistakes, fail, get things wrong, and feel like you don't have any control over outcomes. Author Matt Blumberg has been there, and in Startup CEO he shares his experience, mistakes, and lessons learned as he guided Return Path from a handful of employees and no revenues to over \$100 million in revenues and 500 employees. Startup CEO is not a memoir of Return Path's 20-year journey but a thoughtful CEO-focused book that provides first-time CEOs with advice, tools, and approaches for the situations that startup CEOs will face. You'll learn: How to tell your story to new hires, investors, and customers for greater alignment How to create a values-based culture for speed and engagement How to create business and personal operating systems so that you can balance your life and grow your company at the same time How to develop, lead, and leverage your board of directors for greater impact How to ensure that your company is bought, not sold, when you exit Startup CEO is the field guide every CEO needs throughout the growth of their company.

Thousands of years, hundreds of generations, and countless hours of research; men have been trying to figure out the inner workings of the female mind. Now after all this time wishing women came with an instruction manual, it's finally here. Everything man knows about women and how their mind works are contained in these pages. Regrettably, after all this time, men still haven't figured out squat about women. That's why the pages of this book are mostly blank. But fear not, that just means you will have plenty of room in every chapter to write down what you learn about the woman in your life. This book offers multiple uses. 1) This can be given as a gift, providing a subtle hint to a man you know that is not as knowledgeable as he thinks. 2) Women, you can fill in the pages yourself. What better gift to give a man than the customized manual to how your mind works. 3) Men can use their keen observational and problem-solving skills as they expertly write down everything there is to know about how and why the woman in their life thinks and behaves the way they do. Great for men who are just starting to date, in a long-term relationship, engaged, or married. It's never too early or too late to give a man the knowledge and information that has been searched for over thousands of years.

"The Astronaut Instruction Manual is a fantastic and vibrant preparatory guide for today's youth — whether their futures are off in space or right here...on Earth." — Lori Garver, Former NASA Deputy Administrator Endorsed by authors, teachers, and congressmen alike, Mike Mongo's Astronaut Instruction Manual excites a new generation of space explorers. The book, designed for children between the ages of 6 and 13, is a functioning, interactive instruction manual. Using mad-lib-style fill-in-the-blanks, Mongo encourages his readers to articulate and illustrate their own vision of next-generation space travel. The Astronaut Instruction Manual captures a new era of enthusiasm for space exploration, driven in part by new space celebrities (Commander Chris Hadfield, Elon Musk), and in part by a shift in popular interest in space (SpaceX rockets, The Mars Colonial Transporter, Kerbal).

Welcome to the surreal, misshapen universe of Adam Marek's first collection; a bestiary of hybrids from the techno-crazed future and mythical past; a users' guide to the seemingly obvious (and the world of illogic implicit within it). Whether fantastical or everyday in setting, Marek's stories lead us down to the engine room just beneath modern consciousness, a place of both atavism and familiarity, where the body is fluid, the spirit mechanised, and beasts often tell us more about our humanity than anything we can teach ourselves.
