formula and hydrogen is after nitrogen
in a formula such as NH_3 .

7.11: Naming Binary Molecular Compounds - Chemistry LibreTexts

You learned that naming simple binary ionic compounds is easy. Name the cation first with the element name,

Get Free Writing And Naming Binary Compounds

then name the anion and add -ide to the end. Naming ionic compounds with transition metals isn't too hard either. They are named like the binary compounds, with the cation first, then the anion with -ide added to it, but you have to take into account the variations of the metal ions.
